

For Immediate Release:

Buckeye Technologies, Inc engages New Dimension Solutions, Inc for the first phase of the company's project to install SAP R/3 for Enterprise Asset Management

New York, January 3, 2006 – New Dimension Solutions, Inc (NDS) www.nd-solutions.com will assist Buckeye Technologies with the design and implementation of a new SAP-Based **Enterprise Asset Management (EAM)** system. The new processes and system will provide a competitive business advantage using information technology through Plant Maintenance, Material Management, and the Financial Modules of SAP.

The complete scope of this project will replace the company's systems with an integrated SAP solution. This first phase of the project will address the critical areas of:

- Validation of the cost model to insure it meets the company's operational requirements scope
- Develop a working and representative prototype and design
- Design a configuration and implementation strategy
- Implement development of M, S & P in the SAP Environment
- Develop a knowledge transfer and change management strategy
- Train Buckeye's core team on the central EAM functions
