## PRESS RELEASE

# Pipeline Software announces support for Impress Software users and teams with New Dimension Solutions to provide disruption-free Safe Passage solution

**SANTA ANA, Calif., June 1st, 2008** — Pipeline Software Inc. today announced immediate availability of technical support for companies using Impress Software's SAP-Primavera integration software. Additionally, Pipeline has partnered with leading SAP EAM integrator New Dimension Solutions (NDS) to provide a "safe passage" program that provides Impress users with a disruption-free migration path to Pipeline Transporter, the industry-proven SAP-Primavera integration solution.

"Pipeline Software may be the most qualified, uniquely positioned company in the world to provide support for Impress Software's EPM solution. We are already supporting the SAP-Primavera integration solutions of some of the world's largest companies," said Raju Patel, CTO of Pipeline Software. "As the developer of Pipeline Transporter, our staff is intimately familiar with all technical and business process nuances of integrating SAP PS and PM modules with Primavera. We do it for a living."

In addition to offering technical support for Impress solutions, Pipeline will offer a migration solution that provides customers the option of upgrading their current Impress solution to a Pipeline Transporter solution.

"Not only is our solution fully industry-proven and currently operating in some of the most demanding SAP and Primavera integration scenarios in the market, but we also have specific experience in migrating organizations from Impress EPM to Pipeline Transporter," commented Charlie Sundling, CEO of Pipeline Software, "We have already performed several such migrations and our customers have been very satisfied with the results.

Mr. Sundling commented further, "In order to ensure smooth migrations for customers we have teamed up with the folks at New Dimension Solutions because of their deep capabilities in SAP EAM and their understanding of the Pipeline solution. We look forward to working them further to provide customers with a disruption-free migration."

"NDS will be committing senior SAP Planning and Scheduling consultants to the Safe Passage solution. NDS has always had extensive EAM Planning and Scheduling experience. Recently, we further enhanced our Planning and Scheduling focus as the result of several successful and unique project completions with large utility clients." said Jeff Briner, Executive Vice President for New Dimension Solutions. "NDS partnered with Pipeline Software because of their functional and technical leadership in SAP to Primavera integration – especially in demanding, high-intensity situations. We know that NDS SAP EAM Skills and the proven Pipeline Product can quickly deliver the Safe Passage Solution"

**About Pipeline Software, Inc.**

Pipeline Software Inc., the SAP Integration Experts, provides global companies with a better way to connect their non-SAP applications with SAP. Focused exclusively on SAP connectivity and cross-system integration, Pipeline Software offers a suite of software tools, products and services that make it quicker, easier and more effective for customers to integrate their non-SAP applications with SAP. More than 200 midrange companies and global corporations rely on Pipeline Software to reduce the risk and increase the performance of their mission-critical SAP integrations.
